

MEMORANDUM FOR THE RECORD

16 April 1965

PROPOSED FACILITY FOR THE STORAGE OF USIB FINISHED INTELLIGENCE MATERIALS

1. On 16 April 1965 I talked to Mr. Paul Borel, Chairman and CIA Member of CODIB and advised him that at [redacted] suggestion, I have STAT coordinated the staff study on the proposed USIB Records Center with STAT [redacted] and both of them agree that this is a good idea and they have no objections.

2. Mr. Borel said he thinks this is an excellent idea and is a "milestone" in the Agency records management program. He will see that the staff study is included on the agenda for either the May or June CODIB meeting. At that time he would like for me to be present to explain how the plan will be put in to operation.

3. I advised him that on a long range basis CIA would save at least \$500,000, because if we did not have the GSA facility to use for storage of finished intelligence materials we would have to add to our present Records Center [redacted] within two to three years.
